

Customer Journey Map

Date	30 June 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1: Application Submission	Stage 2: Credit Evaluation	Stage 3: Decision & Disbursement
Actions <i>What does the customer do?</i>	- Visits the Smart Lender web portal - Fills in personal, financial, and property details - Submits the loan application form	- Waits for the system to process the submitted data - Reviews the predicted approval status shown on screen - May be asked to upload supporting documents for verification	- Receives the final approval or rejection notification - Contacts the credit officer for clarification if needed - Proceeds with loan disbursement formalities if approved
Touchpoint <i>What part of the service do they interact with?</i>	- Smart Lender web application (Flask UI) - Application input form - Email/SMS confirmation of submission	- XGBoost prediction engine (backend) - Real-time result display screen - Document upload interface	- Approval/rejection notification screen - Credit officer / bank representative - Loan disbursement and documentation desk
Customer Thought <i>What is the customer thinking?</i>	"I hope I am entering all the details correctly." "Will this process be faster than visiting the bank?" "I hope my credit history works in my favor."	"How long will the prediction take?" "Is the system accurately assessing my profile?" "I wonder if I need to provide more proof of income."	"Finally, I know where I stand." "Was the decision fair and well-informed?" "What are the next steps to get my loan?"
Customer Feeling <i>What is the customer feeling?</i>	Curious but slightly uncertain about the new digital process	Anxious while waiting, hopeful for a positive outcome	Relieved and confident if approved; disappointed but informed if rejected
Process Ownership <i>Who is in the lead on this?</i>	Applicant / Front-end UI Team	ML Model (XGBoost) / Backend Development Team	Credit Officer / Bank Operations Team
Opportunities <i>How can we improve this stage?</i>	- Simplify the form with auto-fill and validation hints - Add a progress indicator for multi-step entry - Provide tooltips explaining required fields	- Display a confidence score alongside the prediction - Reduce processing/response time further - Add a chatbot to answer queries during the wait	- Send proactive SMS/email updates on next steps - Offer a clear rejection explanation with improvement tips - Enable digital document signing for faster disbursement
