

Project Initialization and Planning Phase

Date	30 June 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statements:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit officer evaluating a salaried applicant.	Fast-track loan approval for low-risk applicants.	Manual review processes slow down decision-making.	The applicant has a good credit history and stable income, which the model predicts as high-confidence approval.	Confident and efficient in approving low-risk applications quickly.
PS-2	A loan applicant who is self-employed with irregular income.	Secure loan approval despite an unconventional income profile.	No prior credit history exists to validate repayment capability.	The system flags such profiles as high-risk based on the trained ML model, requiring further document verification.	Anxious about the uncertainty of approval and the need for additional scrutiny.
PS-3	A financial analyst handling a high volume of loan applications.	Evaluate multiple applicants quickly without compromising accuracy.	Manual, one-by-one evaluation is time-consuming and error-prone.	The XGBoost-based prediction model enables rapid, consistent batch evaluation of applicants.	Reassured and productive, able to maintain compliance while saving time.
